

RAP 311 Equipment Receiving

[rap](#) [receiving](#) [purchasing](#) [engineering](#) [templates](#) [proof-of-deliver](#)

From Rovipedia, the RoviSys encyclopedia

Approved

Purpose: To define and document procedures related to incoming packages to ensure timely distribution of items arriving at RoviSys on a daily basis.

Accepted Standard Files:

Proof of Delivery Form (MS Word) - 'Administrative' folder. Reference [RAP 005 Document Templates Policy](#)

Note: This RAP contains the detailed steps for Receiving. An overview of how Receiving fits into the Accounts Payable workflow can be found [here](#).

1. Package arrival times:

1. Next day air, overnight, and 2nd Day Air items usually arrive by 10:30 am.
2. UPS Ground shipments usually arrive by 1:00 pm.

2. Items arriving by unusual means (Rexel truck, tractor/trailer, a pick-up in person)

1. Packing slip should be stamped with the date.
2. Left on the receiving desk in the back.

3. Shipments that arrive at the front door:

1. Take to the receiving desk in back.
2. Member of the receiving department will check it in.

4. Check in Procedure of Hardware ordered on a RoviSys PO:

1. Verify package contents matches Packing Slip.
2. Compare Packing List to Purchase Order (Notify purchase of discrepancies)
3. Log the items received into GrandView noting the quantity and date received.
4. Scan the Packing Slip as a PDF file. Find the Purchase Order in GrandView and upload the PDF Packing Slip to the Purchase Order Files.
5. Notify the purchaser the item has arrived and location on the receiving shelves via email. Stock items ordered for RoviSys internal use shall be placed in the appropriate areas unless otherwise indicated on the purchase order. If help is needed, other available employees will assist. Express overnight delivery notification should be done in person if possible
6. The receiving department will create a labeled job tote if one is requested.
7. A member of the job team is responsible for seeing that the items are removed from the receiving area within three days and put in their proper place.

5. Check in Procedure for RoviSys Computers and Software:

1. Verify package contents matches Packing Slip.
2. Compare Packing List to Purchase Order (Notify purchase of discrepancies).
3. Log the items received into GrandView noting the quantity and date received.
4. Stamp the packing slip with the date received.
5. Give the original packing slip to the Office Manager and place a copy of the packing slip with the package.
6. Notify Software Administrator that the items were received.
7. Software Administrator will assign an asset number and enter the information into the computer/software inventory in Grandview.
8. Software Administrator will notify purchaser the item has arrived and the location on the receiving shelves via e-mail. Express overnight delivery notification should be done in person if possible.
9. All software will then be placed into a software tote.
10. Purchaser is responsible for seeing that the items are removed from the receiving area within three days and put in their proper place.

6. Items not ordered on a RoviSys purchase order, but rather by a customer:

1. Verify package contents matches Packing Slip.
2. Stamp the packing slip with the date received.
3. Give the original packing slip to the Project Manager, who is then responsible for seeing that all such packing lists are given to the customer's representative.
4. Notify the Project Manager and/or Lead Engineer of the associated job of its arrival and the shelf location where it was placed via e-mail. Express overnight delivery notification should be done in person if possible.
5. A member of the job team is responsible for seeing that the items are removed from the receiving area within three days and put in their proper place.
6. The receiving department will create a labeled job tote if one is requested.

7. Items ordered on a RoviSys purchase order and shipped directly to the Customer:

1. The Project Manager or Lead Engineer is responsible for obtaining proof of delivery. Proof of delivery is either the original packing slip or a signed Proof of Delivery form.
2. Proof of delivery must contain the date the Customer received the package and either the signature of the individual who signed for the package or the RoviSys Project Manager.
3. The onsite employee must verify that the contents of the delivery match what is recorded on the Packing Slip. If there are any differences they must be noted (i.e. If 3 items were shipped but only 2 were received).

4. The onsite employee must check that the Packing Slip has a Purchase Order number on it. If the vendor did not include the Purchase Order number, the onsite employee must hand write the PO number onto the Packing Slip.
5. The onsite employee **MUST CAPTURE the Proof of Delivery or Packing Slip** (scanned PDF or high res picture).
6. The Onsite employee will send the digital copy of the Proof of Delivery to receiving@rovisys.com (if RoviSys Asia send to sg. RVS = receiving@rovisys.com and RBT = receiving@rovisysbt.com)
8. Delivery of personal items:
 1. The receiving department must be notified with an e-mail stating where the package is being sent from and expected delivery date.
 2. We must always remember to respect each other's privacy. Violations will result in disciplinary action.
 3. Personal items are to be removed from the receiving area within three days.
9. Items are not to be removed from the receiving area unless:
 1. The item is needed right away, a member of the receiving department is to be notified and the item checked in.
 2. If a member of the receiving department is not available, the person needing the item should:
 1. Verify the contents against the packing slip.
 2. Stamp the packing with the date and leave it on the receiving desk.
 3. Receiving Department will check-in the items as soon as practicable.
 4. If the item is a computer or software, the Software Administrator and Receiving Department must be notified the item was taken.
10. Under no circumstance shall any package, envelope, container, etc. be opened or removed from the receiving area unless:
 1. The employee is certain that the item is specific to a project they are working on.
 2. The employee requires the item immediately to proceed with the job.
11. Proper places for equipment/materials to be stored include:
 1. In a tote or on a shelf with the job number clearly visible on tote or box.
 2. In the checkout area assigned to the project.
 3. In the purchaser's office (only if the item is very small or is needed in the purchaser's office).
12. If large items arrive and there is no designated checkout area for them:
 1. The Receiving Department will notify the Project Manager or Lead Engineer of the associated job that the items have arrived.

2. Project Manager or Lead Engineer contacts the System Checkout Coordinator with a request for space.
 3. Large items will be placed in a dedicated receiving area until the Checkout Coordinator assigns a space.
 4. When the Checkout Coordinator assigns a space in the checkout area, a member of the job team is responsible for seeing that the items are moved to that space as soon as possible.
13. Discarding of Packaging Material includes:
1. Placing peanuts, air pouches, bubble wrap and foam in the appropriate blue bin in the shipping area.
 2. If the bin is full, the item should be thrown in the trash.
 3. Cardboard boxes shall be broken down and placed in the cardboard recycling bin.
14. For closing out job totes in the checkout area:
1. The job tote and label are to be removed for the checkout shelf.
 2. The tote is to be placed on the receiving shelves.
 3. Miscellaneous parts are to be placed on the spare parts shelves and added to the spare parts list that is attached to the shelves.

RoviSysNC Procedure

For all packages that are delivered to RoviSysNC, they can be received in two (2) areas

The checkout area near the overhead doors

The main entrance (generally for smaller packages requiring a signature.)

From this point

Checkout: Packages have a designated area for incoming deliveries marked by yellow tape on the floor and should be directed to be placed there.

Accepting the package: Due to the lack of a specific shipping coordinator the delivery person will knock on the door and will be allowed access by someone working in the checkout. That same person will then sign for the packages.

Why do you sign:

To verify the number of packages delivered equal the number on the screen where you will be asked to sign verifying acceptance of the delivery.

To verify package/contents have not been damaged: If a package is damaged by the carrier and we received the package in with a signature the sender may have no recourse with the insurance for a damaged part.

Box is damaged but contents are not: Open the package to confirm there is no damage to the item. If you see no visible damage but unsure, insist they note exterior package damaged no visible damage to part and then sign.

Both Box and Contents are damaged: Do not sign for that package. Refuse the package and request they return it to the sender stating damaged.

Notification: After signing for a delivery look over packaging for an obvious name. Send an email and notify them of the delivery received in check out. If no obvious name exist, nothing more needs to be done.

Person expecting a delivery: If you are expecting a delivery you will have to go to the designated “in coming” area in checkout and locate your packages.

Main Entrance Delivery:

Accepting the package: Front desk person will sign and verify the package in the same manner as receiving from checkout noted above.

Notification: Front desk person will review names or PO #'s and send an email to the individual. If these two pieces of info are not available, an email to “EveryoneNC” will go out with the packing slip attached along with a request for someone to claim.

The package will be taken to the designated delivery area in checkout if not retrieved immediately at the front desk.

Person expecting a delivery: If you are expecting a delivery you will have to go to the designated “in coming” area in checkout and locate your packages.

RECEIVING THE PACKAGE IN

The Project Manager, Lead Engineer or a person designated to do so by PM or LE is responsible for obtaining proof of delivery.

Proof of delivery is either the original packing slip or a signed Proof of Delivery form form should there be no packing slip or it has been lost.

Verify all parts have been received:

Verify the packing slip contents shipped = the contents received.

YES all received: Verify that the packing slip has the PO # on it. If it does not write the number on it. Write the date you verified the contents and print your name legibly.

NO not all contents received: If there are any differences they must be noted on the packing slip (i.e. If 3 items were shipped but only 2 were received) Verify that the packing slip has the PO # on it. If it does not write the PO number on it. Write the date contents were verified and print your name legibly.

Date and sign: Verify that the packing slip has the PO # on it. If it does not write the number on it. Write the date you verified the contents and print your name legibly.

Send Packing slip or POD to be received in GrandView.

Scan or capture an image of the Proof of Delivery or Packing Slip (scanned PDF or high res picture).

Send the packing slip to receiving@rovisys.com or receiving@rovisysbt.com

Upload the packing slip to the PO in the receiving folder.receiving@rovisys.com or
receiving@rovisysbt.com

RoviSys Asia procedure

Please follow the procedures outlined in the following document:
